The Inclusive Classroom Staff Development Modules

Available only through
2 Teach LLC

Each staff development module is created for a comprehensive presentation. They are designed so that any educational site can facilitate their own staff development without any additional materials. Each module includes:

- ❑ Introduction to the Topic – *1-2 pages narrative description of the topic*
- ❑ Tips for Facilitators – *1-2 pages of information for facilitators regarding presentation.*
- ❑ Training Outline – *Suggested guidelines for time allocation for each activity; total equals 2 hours, however facilitators can modify presentations to make them longer, shorter or even break the presentation into multiple sessions if desired.*
- ❑ Facilitator’s Script – *Detailed narrative script for facilitators to follow. Facilitators can read the script verbatim with each slide or choose to paraphrase.*
- ❑ Participant Handouts – *Blackline master of handouts to go along with presentation. Handout #1 in each module is a copy of the powerpoint slides in notes format. Other handouts vary per module, although each also includes a handout of important references (articles, texts, etc) for participants. Facilitators make copies as needed.*
- ❑ Literature Review – *Each module includes a thorough review of the literature and research on the topic of focus. This manuscript enables facilitators to read about the topic prior to presenting on it, in order to be abreast of the most current information.*
- ❑ Resources – *Information on additional print, internet or video resources is available on each focus topic in case facilitators are interested in obtaining additional information.*
- ❑ Powerpoint Slides – *Printed copies of slides are included for facilitators to make overheads if desired.*
- ❑ Powerpoint CD – *A CD is included with each module that provides the presentation in powerpoint format. Most of the modules also include small video clips embedded in the powerpoint, which are also included on the CD.*
- ❑ Binder – *All of the above components are included in one clearly labeled binder for easy access, transportation, and use.*
